## 1.0 Introduction

The PenMount PM1410 control board is a high specification (Projected Capacitive Input, PCI) touch panel controller product introduced by PenMount. The PenMount PM1410 can be applied in the consumer, commercial and industrial fields.

The PenMount PM1410 provides four types of interfaces, USB、I<sup>2</sup>C、UART and RS232 and supports PCI touch panels sized from 12.1" to 15.6". The PenMount PM1410 also supports a wide range of operating systems such as Windows and Linux.

The PenMount PM1410 was developed based on Microchip microprocessors and is paired with PenMount's in-house hardware design and firmware algorithmic mechanism. It provides high performance computing and possesses excellent anti-noise capabilities.

There are five connectors on this board: 60Pin & 40 Pins ZIF connectors for PCI touch screen FPC cables, one USB connector for 4-pin USB cable (optional), and one I<sup>2</sup>C/UART connector for 7-pin I<sup>2</sup>C cable (optional), and one RS232 connector for 5-pin RS232 cable (optional)

## 5.0 Others

### 5.1 ROHS compliance

This control board is ROHS compliant

### 5.2 EMC protection recommendations

Please refer to PCI touch screen integration guides.

### 5.3 Noise protection

To achieve good noise interference protection capabilities, PenMount requires paired interface cables possess comprehensive EMI shielding.

The cable should have a woven or spirally copper shield with 360 ° shield coverage

The shield must be terminated to the receptacle and be connected to ground plane carefully.

Below is an example for 4-pin USB cable diagram. For other implementation, please follow the same design rules.
